EDUCATION

- Netcraft Academy**
UX Design Certificate | Feb 2023 – Jul 2023
- Netcraft Academy**
UX/UI Design Diploma | 2020 – 2021

Hi, I'm Yonatan from TLV, passionate about crafting impactful digital experiences. I combine UX/UI expertise with product strategy and project management to drive user engagement and business growth. Curious, collaborative, and always striving for pixel perfect and data driven design.

WORK EXPERIENCE

Simply Jan 2026 – Present

Senior Product Designer

- Sole designer in an autonomous pod – with a PM, a developer, and musicians – owning features end-to-end for Simply Piano, the flagship product of a \$1.5B music learning company.
- Lead design of the kids experience for ages 6–14, a core segment, adapting the app's flows and visual language to how younger learners actually learn.
- Design for the learning journey as a whole rather than isolated features, shaping the sequence of learning itself alongside the product and pedagogy teams.
- Remove friction points across the app to make progression feel holistic and seamless, supporting retention and annual subscription renewal.
- Ground decisions in user interviews, direct work with musicians and music teachers, and continuous testing and data analysis.

Playtika Feb 2022 – Dec 2025

Senior Product Designer

- Lead design across two top-grossing mobile titles with millions of daily active users.
- Owned end-to-end UX for monetization systems – offers, live events, and core game loops – from discovery through live iteration.
- Built and maintained design systems that scaled across features and teams.
- Partnered with PMs, developers, and analysts to validate design directions through A/B testing.

B.Studios Jan 2021 – Apr 2022

Founder

- Founded and ran a UX/UI studio delivering end-to-end digital products for clients.
- Built scalable design systems and managed cross-functional teams.

Israeli Ministry of Defense Oct 2019 – Oct 2021

Project Manager

- Directed large-scale architectural and interior design projects for defense facilities.
- Led cross-disciplinary teams of architects, engineers, and contractors.
